#### STATE AND LOCAL SALES AND USE TAX REPORT: TAX REVENUE FROM SALES IN CALENDAR YEAR 2012

This report shows by North American Industry Classification System (NAICS) code:

- 1. State sales and use taxes.
- 2. County sales and use taxes by county.
- 3. Baseball park district sales and use taxes.
- 4. Football stadium district sales and use taxes.

In addition, this report includes Premier Resort Area Taxes by municipality.

The sales and use tax data in this report reflect sales that occurred in calendar year 2012, and were obtained from sales and use tax returns filed with the Wisconsin Department of Revenue. Certain amounts collected or remitted through means other than the sales and use tax returns are not included in this report. In particular, the amounts shown do not include collections from occasional sales, interest, or penalties.

The state sales and use tax table shows statewide state sales and use taxes by NAICS classification. The county sales and use tax table shows, for the 62 counties that imposed the tax in 2012, the number of filers and county sales and use taxes by NAICS classification.

In each case where the number of filers is presented, the figure is limited to the number of filers with taxable sales in excess of \$10,000. While the count of filers is only those above this \$10,000 threshold, the amount of taxes shown is for all filers. The number of filers and total taxes are suppressed for NAICS classifications where the number of filers is 10 or fewer. Additional information is suppressed where confidentiality concerns require. Filers above the \$10,000 threshold (where shown) and total taxes are not affected by suppressing the underlying detail. In general, 2-digit NAICS level information is included in each table in this report, even if certain related figures are suppressed. 3-digit information is typically displayed, however, only where disclosure standards permit at least some information to be presented.

The Executive Office of the President, Office of Management and Budget, published the North American Industry Classification System (NAICS) in 1997 to replace and update the 1987 Standard Industrial Classification (SIC) Manual. NAICS is designed for federal data collection, statistical and analytical purposes.

NAICS groups business establishments based on the activities in which they are primarily engaged. NAICS covers the entire economy, classifying activities into 20 sectors and 1,170 industries. The U.S. Bureau of the Census publishes information about NAICS, including links to definitions of industry codes, on its website at http://www.census.gov/epcd/www/naics.html.

The Wisconsin Department of Revenue uses a subset of NAICS codes to classify businesses. When a business registers for Wisconsin business taxes, it selects the NAICS code that best describes its business activities. The codes used by the Department of Revenue are included in the instructions for the Department's Business Tax Registration form (form BTR-101). The form and instructions are available online at http://www.dor.state.wi.us/forms/sales/index.html.

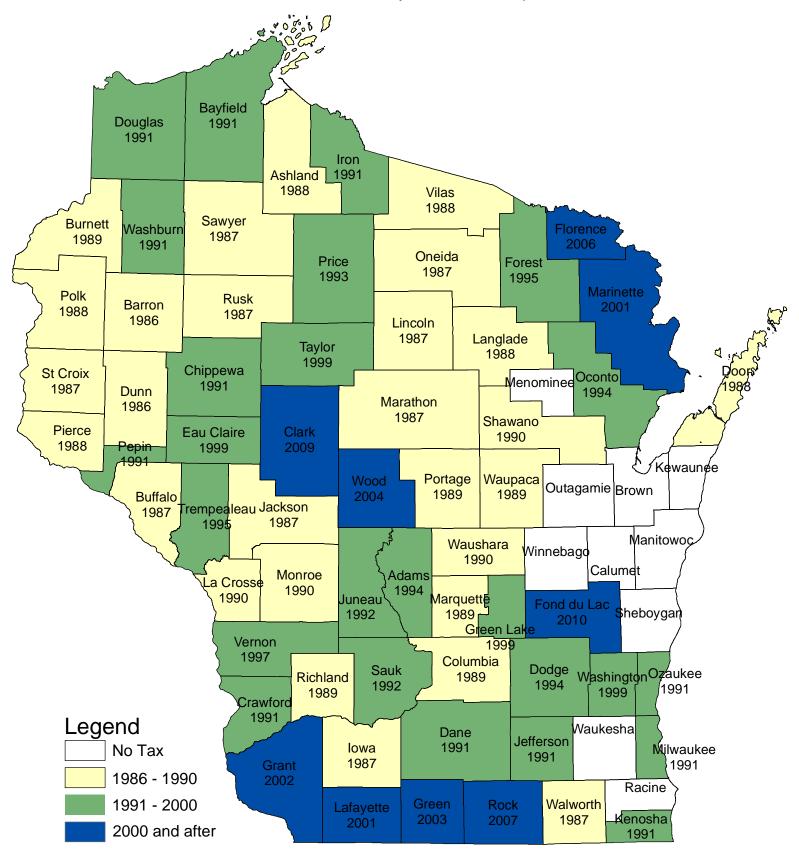

When the Wisconsin Department of Revenue implemented a new sales tax processing system in 2002, existing businesses were converted from SIC to NAICS codes according to a conversion table published by the U.S. Office of Management and Budget. Since the NAICS created new codes and is more detailed than the SIC, a business may have been misclassified in the conversion from SIC to NAICS. In addition, a business may evolve over time such that another NAICS code would be more accurate than the NAICS code (or SIC code) originally selected. These codes are updated based on businesses registration forms, but caution should be exercised in using the data as a measure of economic activity for a particular NAICS code.

Chart 1 is a map showing the year county sales and use taxes were imposed as of December 2012. Counties are color-coded to show the period in which they imposed their taxes. Table 1 shows the total sales and use tax rate in each county as of December 2012 and the date the tax was imposed.

As of December 2012:

- 7 counties had a total rate of 5.0% (5.0% state sales and use tax)
- 2 counties had a total rate of 5.1% (5.0% state and 0.1% baseball park district sales and use tax).
- 60 counties had a total rate of 5.5% (5.0% state and 0.5% county sales and use tax, except in Brown County, where the 0.5% rate is the football stadium tax).
- 3 counties had a total rate of 5.6% (5.0% state, 0.1% baseball park district and 0.5% county sales and use tax).

#### 1. STATE SALES AND USE TAX BY NAICS CODE, 2012

The vast majority of the state's sales and use tax collections are received by the state from businesses and individuals reporting taxable sales and taxable purchases. Taxable sales and purchases in calendar year 2012 produced state sales and use taxes of \$4,175,324,540 as reported by these filers. This amount does not include collections on occasional sales, interest, or penalties. Since sales and use taxes fall primarily on tangible personal property sold to final consumers, businesses classified in retail trade account for the largest component of sales tax as reported, equaling 47% of state sales and use taxes in 2012.

Table 2 shows the amount of state sales and use tax in 2012 by NAICS code. The data were obtained from sales and use tax returns filed with the Wisconsin Department of Revenue. The number of filers shown in the table is limited to filers with taxable sales in excess \$10,000 in 2012. As shown, the number of filers that reported taxable sales exceeding \$10,000 in 2012 was 82,702 (The total number of filers, including those under \$10,000 in taxable sales, was 155,692). The sales and use tax amounts in the table include all filers.

"State Sales and Use Tax" is the amount of state sales and use tax reported by the taxpayer. It does not include penalties, interest, or the reduction for the "retailer's discount" which a seller of taxable goods or services is permitted to retain for collecting and timely remitting the tax. The retailer's discount is the greater of 0.50% of the seller's sales tax liability or \$10 per return for returns filed timely. Effective October 1, 2009, the retailer's discount was limited to \$1,000 per reporting period.

Occasional sales are also excluded from the figures in table 2. Occasional sales include sales by one individual to another of used motor vehicles, boats, snowmobiles, mobile homes 45 feet or less in length, trailers, semi-trailers, all-terrain vehicles and aircraft. Use tax is collected when these vehicles are registered with the state.

#### 2. BASEBALL PARK DISTRICT SALES AND USE TAX, 2012

The baseball park district sales and use tax was authorized by 1995 Act 56. The effect of the Act was to impose a 0.1% sales and use tax in the five southeast counties of Milwaukee, Ozaukee, Racine, Washington, and Waukesha as of January 1, 1996. Under 1995 Act 56, the state retains a state administrative fee of 1.50% of tax collections.

Transactions in calendar year 2012 generated baseball park district sales and use taxes of \$25,811,049. This is the amount of district sales and use tax reported by the taxpayer. It does not include penalties, interest, occasional sales, or the reduction for the retailer's discount. It is also prior to the reduction for the state's administrative fee.

Baseball park district sales and use tax proceeds are distributed to the Southeast Wisconsin Professional Baseball Park District.

Table 3 shows the number of filers and baseball district sales and use taxes in 2012 by NAICS code. Consistent with the discussion above, the figures in Table 3 exclude penalties, interest, occasional sales, the reduction for the retailer's discount, and are prior to the reduction for the state 1.5% administrative fee.

The number of filers shown is the number of sellers in a NAICS code that filed a sales tax return in 2012 and reported taxable sales exceeding \$10,000. While this \$10,000 threshold excludes certain smaller scale entities located in the district, it allows the exclusion, from the count of filers, many entities that may be making limited sales into the district but are not located within the district. Without this threshold, for example, a retailer without a physical presence within the district would be listed as a filer so long as they engaged in at least one transaction sourced to a location within the district, whether physically located within the district or not, the number of filers excludes businesses with taxable sales less than \$10,000. The sales and use tax amounts, however, includes all filers.

Taxpayers do not report baseball park district tax data by county.

#### 3. FOOTBALL STADIUM DISTRICT SALES AND USE TAX, 2012

The football stadium district sales and use tax was authorized by 1999 Act 167. The effect of the Act was to impose a 0.5% sales and use tax in Brown County as of November 1, 2000. 1999 Act 167 specified a state administrative fee of 1.50% of tax collections.

Transactions in calendar year 2012 generated football stadium district sales and use taxes of \$21,995,920. This is the amount of district sales and use tax reported by sellers of taxable goods and services. It does not include penalties, interest, occasional sales, or the reduction for the retailer's discount. It is also prior to the reduction for the state's administrative fee.

Football stadium district sales and use tax proceeds are distributed to the Green Bay/Brown County Professional Football Stadium District.

Table 4 shows numbers of taxpayers and football district sales and use taxes in 2012 by NAICS code. Consistent with the discussion above, the figures in Table 4 exclude penalties, interest, occasional sales, the reduction for the retailer's discount, and are prior to the reduction for the state 1.5% administrative fee.

The number of filers shown is the number of taxpayers in a NAICS code that filed a sales tax return in 2012 and reported taxable sales exceeding \$10,000. While this \$10,000 threshold excludes certain smaller scale entities located in the district, it allows the exclusion, from the count of filers, many entities that may be making limited sales into the district but are not located within the district. Without this threshold, for example, a retailer without a physical presence within the district would be listed as a filer so long as they engaged in at least one transaction sourced to a location within the district. To limit the filer count to those with a more significant level of taxable sales in the district, whether physically located within the district or not, the number of filers excludes businesses with taxable sales less than \$10,000. The sales and use tax amounts, however, includes all filers.

Table 4 shows football district sales and use taxes in 2012.

#### 4. PREMIER RESORT AREA TAX BY MUNICIPALITY, 2008 - 2012

The premier resort area tax was authorized by 1997 Act 27. If 40% of a municipality's or county's equalized value is used by tourism-related retailers as defined by law, the municipality or county may declare itself a premier resort area. A premier resort area may impose a 0.5% tax on the gross receipts from the sale, lease or rental in the municipality or county of goods or services that are subject to the state sales tax and sold by specified tourism-related retailers. 2005 Act 25 specified additional tourism-related retailers that are subject to the tax as of September 1, 2006. 1997 Act 27 also provided for a 3% administrative fee to be deducted from gross tax collections. The tax rates for the Village of Lake Delton and the City of Wisconsin Dells increased from 0.5% to 1.0% on January 1, 2010.

Subsequent legislation has authorized certain municipalities to declare themselves as premier resort areas even if they did not meet the 40% of value threshold. 2001 Act 16 authorized the City of Eagle River to designate itself a premier resort area. 2001 Act 109 allowed the City of Bayfield to designate itself a premier resort area and levy the tax. 2005 Act 856 allowed the Villages of Ephraim and Sister Bay to designate themselves premier resort areas and levy premier resort area taxes, pending two-thirds vote of approval in a referendum.

Table 5 shows distributions based on sales in calendar years 2008 through 2012. As of December 2012, Ephraim and Sister Bay have not imposed the premier resort area tax.

	Wisconsin Dells	Lake Delton	Bayfield	Eagle River	Totals
2008	\$649,478	\$1,837,827	\$61,601	\$138,809	\$2,687,715
2009	\$615,700	\$1,955,461	\$61,445	\$147,192	\$2,779,799
2010	\$1,158,443	\$3,885,064	\$67,457	\$146,411	\$5,257,376
2011	\$1,242,236	\$4,678,991	\$56,296	\$159,161	\$6,136,684
2012	\$1,410,786	\$4,555,832	\$74,041	\$153,584	\$6,194,244

 TABLE 5

 PREMIER RESORT AREA TAX BY MUNICIPALITY 2008 - 2012

#### 5. COUNTY SALES AND USE TAX BY NAICS CODE, 2012

Counties are authorized to impose a 0.5% county sales and use tax. Table 6 presents total county sales and use tax information by NAICS code for the 62 counties that levied the tax in 2012. The state retains 1.75% of county sales and use taxes for the state's administrative costs.

The reader is advised to exercise caution when using these data as indicators of economic activity in a county for the reasons noted on page 1. As noted, NAICS codes are self-assigned by businesses and may not be updated as business activities change over time. Additionally, some NAICS codes are not reported or are reported incorrectly. The number of filers shown is the number of taxpayers in a NAICS code that filed a sales tax return in 2012 and reported taxable sales exceeding \$10,000.

Transactions in calendar year 2012 generated county sales and use taxes of \$295,566,866. This is the amount of county sales and use tax reported by sellers/retailers. It does not include penalties, interest, occasional sales, or the reduction for the "retailer's discount" which a taxpayer is permitted to retain for collecting and timely remitting the tax. This figure is also prior to the reduction for the state administrative fee. The retailer's discount is the greater of 0.50% of the taxpayer's sales tax liability or \$10 per return for returns filed timely. Effective October 1, 2009, the retailer's discount was limited to \$1,000 per reporting period. Occasional sales include the sale from one individual to another of certain vehicles.

#### **Comparison to County Sales and Use Tax Distributions**

Distribution of county sales and use tax collection are made to counties on a monthly basis. The amount received by the each county imposing the tax during 2012 will differ from the amounts in Table 6 due to the retailer's discount, administrative costs, interest, penalties, occasional sales, and timing issues. The tax amounts reflect the amounts reported by the filers and not the final payments made by taxpayers or to counties.

#### County Sales and Use Tax by County

Table 7 presents county sales and use tax information by NAICS code by county for the counties that levied the tax in 2012. The "Number of Filers" shown in each County is the number of sellers/retailers in a NAICS code that filed a sales tax return in 2012 and reported taxable sales exceeding \$10,000. A business that remits sales and use tax in Wisconsin would show up as a filer in any county in which the retailer engaged in a transaction. For example, a retailer without a physical presence in Dane County would be required to be a filer for Dane County so long as it engaged in at least one transaction sourced to Dane County. If this retailer had taxable sales in the county in excess of \$10,000, it would be included in the count of filers for Dane County in Table 7 that exceed this threshold. Regardless of its magnitude of taxable sales, the Dane County sales and use tax from this filer would be included in the county's sales and use tax dollar amount in Table 7.
