Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

GWEN TORKELSON  
P.O. BOX 69  
GRAND MARSH, WI 53936

MUNICIPALITY OF NEW CHESTER  
MUNICIPALITY CODE 01020

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MARIAN SCHRAUFNAGEL  
PO BOX 44  
MASON, WI 54856

MUNICIPALITY OF MASON  
MUNICIPALITY CODE 04151

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

GREEN BAY, WI 54301

MUNICIPALITY OF GREEN BAY  
MUNICIPALITY CODE 05231

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

ALMA, WI 54610-0277

MUNICIPALITY OF ALMA  
MUNICIPALITY CODE 06201

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.

Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

PJ MONSON  
PO BOX 207  
ARLINGTON, WI 53911-0207

MUNICIPALITY OF ARLINGTON  
MUNICIPALITY CODE 11101

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director

MADISON, WI 53705-2115

MUNICIPALITY OF SHOREWOOD HILLS  
MUNICIPALITY CODE 13181

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

KATHY BURGER  
PO BOX 273  
SOLON SPRINGS, WI 54873-0273

MUNICIPALITY OF SOLON SPRINGS  
MUNICIPALITY CODE 16181

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MUNICIPALITY CODE 22226

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

BECKY FREDERICKS  
PO BOX 284  
HIGHLAND, WI 53543-0284

MUNICIPALITY OF HIGHLAND  
MUNICIPALITY CODE 25136

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director

MUNICIPALITY OF WATERTOWN  
MUNICIPALITY CODE 28291

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

Notice of Value of Property Tax Exempt Computers  
Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

MILISSA STIPE  
PO BOX 307  
LUXEMBURG, WI 54217-0307

MUNICIPALITY OF LUXEMBURG  
MUNICIPALITY CODE 31146

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MUNICIPALITY OF ANTIGO  
MUNICIPALITY CODE 34201

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MOSINEE, WI 54455-9003

MUNICIPALITY OF KRONENWETTER  
MUNICIPALITY CODE 37145

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

MUNICIPALITY CODE 38271

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

Notice of Value of Property Tax Exempt Computers  
Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

CATHERINE A ROESKE  
8040 S 6TH STREET  
OAK CREEK, WI 53154

MUNICIPALITY OF OAK CREEK  
MUNICIPALITY CODE 40265

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

September 30, 2016

JAYNE BRAND  
800 BORNER ST  
PRESCOTT, WI 54021

MUNICIPALITY OF PRESCOTT  
MUNICIPALITY CODE 47271

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MUNICIPALITY CODE 49191

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

MUNICIPALITY OF FOOTVILLE  
MUNICIPALITY CODE 53126

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

SANDI HAZER  
PO BOX 337  
HAMMOND, WI 54015-0337

MUNICIPALITY OF HAMMOND  
MUNICIPALITY CODE 55136

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

September 30, 2016

SUSAN RICHARDS  
828 CENTER AVE  
SHEBOYGAN, WI 53081-4442

MUNICIPALITY OF SHEBOYGAN  
MUNICIPALITY CODE 59281

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

CARRIE BRUDOS  
PO BOX 37  
DE SOTO, WI 54624-0037

MUNICIPALITY OF DE SOTO  
MUNICIPALITY CODE 62116

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Notice of Value of Property Tax Exempt Computers  
Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

VICKI BUSICK  
PO BOX 6  
BIRCHWOOD, WI 54817-0006

MUNICIPALITY OF BIRCHWOOD  
MUNICIPALITY CODE 65106

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Tax Exempt Computers in Tax Incremental Finance Districts

September 30, 2016

JANICE MOYER  
W156 N8480 PILGRIM RD  
MENOMONEE FALLS, WI 53051-314

MUNICIPALITY OF MENOMONEE FALLS  
MUNICIPALITY CODE 67151

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services

September 30, 2016

BARBARA VAN CLAKE  
205 S WEBSTER AVENUE  
OMRO, WI 54963-0399

MUNICIPALITY OF OMRO  
MUNICIPALITY CODE 70265

Dear Village or City Official:

The Wisconsin Department of Revenue (DOR) is providing your tax district's 2016 equalized value of tax exempt computers located within a Tax Incremental Finance District.

Your municipality will receive 2017 state exempt computer aid. You must include this state aid payment and tax increment generated in each TID, as a revenue for that TID.

Calculating Exempt Computer Aid:

If you follow the steps below, your estimated payment will be the same amount DOR calculated. If you have multiple TIDs, review the data below.

1. Complete your tax district's tax increment worksheet and determine the interim rate in column C
2. Multiply your exempt computer value in each TID by the corresponding interim rate.  
Note: If you do not have a TID in more than one school district or special district, you should only have one interim rate. If you only have one rate, apply it to all TIDs.
3. When determining if a TID generated enough tax increment to equal the qualified expenses, include the amount calculated for each TID as a tax increment. When you close a TID, if any excess tax increment was generated, you must distribute to the other taxing jurisdictions.  
Note: The excess amount includes the exempt computer aid.

If you have questions, contact us at [lgs@wisconsin.gov](mailto:lgs@wisconsin.gov).

Sincerely,

Valeah Foy, Director  
Bureau of Local Government Services
