

Wisconsin Municipal Income Per Return Report for 2019

This report indicates income per tax return for Wisconsin municipalities for 2019, based on income tax returns filed between July 1, 2019, and June 30, 2020 (mostly returns for calendar year 2019). The report shows population estimates, the number of tax returns, Wisconsin adjusted gross income (WAGI), and net tax for each municipality.

This report shows WAGI **per return** rather than WAGI **per capita** because there is a substantial amount of misreporting by tax filers of their municipality of residence. In particular, residents of towns frequently report that they are residents of a neighboring village or city. Misreporting also occurs more often when municipalities are located in more than one county. This misreporting, which cannot be corrected during tax processing, tends to overstate total and per capita WAGI for certain municipalities and understate these amounts for others. In other words, per capita income tends to misrepresent the relative well-being of many municipalities.

Because the number of tax returns and total income may be substantially overstated or understated for any given municipality, the Department of Revenue (DOR) urges that great care be exercised in using these data.

There are additional reasons for exercising caution in using income per return as a measure of a municipality's well-being. First, WAGI includes only income subject to tax and income of persons filing tax returns; it does not include nontaxable income and income of persons not filing returns. Second, income per return is not indicative of income per household because tax filing units do not correspond with households; several members of a single household may file tax returns. Third, the very high or very low (negative) income of a few tax filers can distort both the total income and income per return of a given municipality and county.

The report shows the following data:

- County/municipal code: The two digits before the hyphen are the county code; the three digits after the hyphen are the municipal code. The first digit of the municipal code indicates the type of municipality: "0" indicates a town, "1" a village, and "2" a city.
- County name.
- Municipality name.
- Municipality type (town, village, or city).
- Population: Population estimates are those prepared by the Department of Administration for use in the distribution of Shared Revenue.

- Returns: The number of tax returns filed between July 1, 2019, and June 30, 2020, that report the municipality as the tax filer's residence, except prior year amended returns, which are not included.
- Adjusted gross income (AGI): Also called Wisconsin adjusted gross income, this amount is the same as "Wisconsin income" on the tax return. Wisconsin income equals federal adjusted gross income plus certain additions, such as state and municipal bond interest, and less certain subtractions, such as U.S. government bond interest and excluded long-term capital gains. WAGI is less than personal income, as estimated by the U.S. Department of Commerce, because not all persons are required to file tax returns and because certain income, such as a portion of social security benefits, are included in personal income, but not in WAGI.
- AGI per return: This amount equals AGI divided by the number of returns.
- Median AGI: The level of AGI at which half of returns report higher figures and half report lower figures.
- Net tax: This is the amount of income tax due after non-refundable credits have been taken into account but before refundable credits have been included.
- Net tax per return: This amount equals net tax divided by the number of returns.
- Median net tax: The level of net tax at which half of returns report higher figures and half report lower figures.

In some cases it is possible to identify the county of residence, but the municipality is either missing or invalid. In those cases the return information is included in the county total, but it is not included in any individual municipality.

Several municipalities are located in more than one county. Income tax return data for the portion of the municipality in a given county is shown with the data for that county. Totals for the multiple county municipalities are shown at the end of the report.
